DETAILED ACTION

1. The following is an examiner's statement of reasons for allowance:
2. Regarding claim 1, Larson (4389889) teaches a capacitive level sensor comprising two electrodes, wherein the electrodes' areas are vertically and horizontally offset from each other. However, Larson fails to teach the electrodes being arranged in such a way as to enable rapid detection of a decreasing level of a viscous fluid when a residual film of the viscous fluid remains on an inner surface of a container above the level of the viscous fluid and adjacent a portion of the upper electrode.
3. Regarding claim 21, Larson teaches placing a capacitive structure on the wall of a container, wherein the electrodes' areas are vertically and horizontally offset from each other. Larson does not teach decreasing the level of fluid in a container at a rate sufficient to leave a residual film of a viscous fluid on the container above the level of the fluid and rapidly detecting a signal in response to the decreasing fluid level.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Paul M. West whose telephone number is (571) 272-8590. The examiner can normally be reached on Monday-Friday.
